

Cleveland Psychological Association Welcomes Dr. April Sutton, PsyD

Ethical Considerations and AI

Thursday, November 19, 2026 at 6-7:30p

VIRTUAL – Zoom link provided prior to event

Dr. Sutton is a forensic psychologist and the director of psychology training at Summit Behavioral Healthcare in Cincinnati, Ohio. She earned her doctorate in psychology from Xavier University in 2015 and completed her internship and postdoctoral fellowship at the Wyoming State Hospital. Her interest in education and training led her to develop a forensic externship and forensic postdoctoral fellowship at Summit. She has authored over two dozen entries for psychological encyclopedias and was awarded the Ohio Psychological Association's Early Career Award of Excellence. Dr. Sutton is the chair of OPA's Social Media Subcommittee and has presented on psychology's use of social media and AI in the past. She also co-authored an article on psychologist guidelines for using artificial intelligence, which was published in the Ohio Psychologist.

In this presentation, the audience will learn what artificial intelligence (AI) is and what we know about it so far, including its usage by the general public and how it is already being used in the field of mental health. The audience will also hear about possible benefits and ethical considerations when using generative AI. Finally, the audience will be given some guidance on how to responsibly use AI if they want to integrate it into their professional lives.

**This event is free but registration is required.
Eligible for 1 CE credit.**
